STUDY MODEL

ALBANIA'S ONLY DENTISTRY PROGRAM TAUGHT ENTIRELY IN ENGLISH

With an on-campus University Dental Clinic and supervised clinical progression.

WHY DENTISTRY AT WBU?

Practice is not an add-on. It is how you learn.

We combine a European-standard curriculum with simulation, laboratory work and a carefully supervised path to real patient care.

1 English-taught by design

Study the full Dentistry program in English and build professional vocabulary for an international career.

2 Clinical ecosystem on campus

Train in dedicated simulation laboratories and the WBU Dental Clinic - without leaving the university environment.

3 Balance that builds competence

A 50% theory / 50% practice model helps you connect medical science with precise clinical execution.

4 Technology that mirrors practice

Work with digital tools, CAD/CAM systems, dental units and advanced simulation equipment used in contemporary dentistry.

5 Three forms of practice

EPIC Project, subject-based practice and professional practice create continuous skill development across the five years.

6 International outlook

Learn with Albanian and international academics, join Erasmus+ mobility and strengthen your profile with free language courses.

YOUR 5-YEAR CLINICAL JOURNEY

YEAR 1

Build the science

Medical sciences, dental morphology and first practical skills.

YEARS 2-3

Move into care

Preclinical techniques; supervised patient treatment begins in Year 3, Semester 2.

YEARS 4-5

Become practice-ready

Complex cases, multidisciplinary clinical work and preparation for licensing and further specialization.

Your clinic is on campus.

A real clinical environment, built into your education

At the WBU Dental Clinic, patients of all ages receive care from specialist dentists and clinically trained students under full academic supervision. For students, this means a responsible, structured transition from observation and simulation to patient-centred care.

SUPERVISION

Close guidance from academic staff and specialist dentists.

MODERN CARE

Contemporary technology, safe protocols and professional workflows.

BROAD EXPOSURE

Conservative dentistry, prosthodontics, periodontology, oral surgery, orthodontics, pediatric dentistry.

PATIENT TRUST

Ethics, empathy, communication and responsibility are trained alongside technique.

VOICES FROM THE WBU COMMUNITY

Josephine Bardeli
Dentistry student

“

At WBU, Dentistry is not something we only study in books. Each stage - from simulation to supervised clinical experience - helps us build the precision, confidence and responsibility a future dentist needs.

”

The on-campus clinic, modern laboratories and close supervision gave us confidence that our child is receiving serious academic preparation and developing practical skills in a safe, professional environment.

PARENT PERSPECTIVE

Parent of a WBU Dentistry student

A PROFESSION WITH MANY DIRECTIONS

Graduate ready to build the career you imagine.

After graduation and the applicable licensing process, your Dentistry degree can lead to clinical practice, specialization, research, academia or entrepreneurship.

● General dental practice

● Orthodontics

● Endodontics and periodontology

● Prosthodontics and implantology

● Private clinic or joint practice

● Oral surgery

● Pediatric dentistry

● Research, academia and dental industry
